

Additional Society News

(Continued from Page 3)

been made through the newspapers. The conductor of the afternoon was devoted to the condition and consideration of an exceptionally interesting program under the direction of the literature department. Mrs. J. A. Miller presided over the literary meeting and directed the discussion that followed the readings of the papers in which the assembly participated with lively interest. Mrs. Minne read a carefully chosen paper on "American Humorists." Mrs. Murdy's paper on "American Novels" was very instructive. A paper by Miss Day on "The Heroines of American History" held the close attention of every hearer. A good number by Mrs. McMullan was highly appreciated and one of the most popular numbers was the reading from Riley by Mrs. Hiltz.

The announcement of the meeting next week will attract particular attention and no doubt the club rooms will be crowded, as a subject of vital importance will be discussed by prominent physicians and the public is extended an invitation to attend. Under the auspices of the domestic science department, the Public Health Education Committee of the American Medical Association will be in charge of the program. Dr. Margaret Chaffetz will preside and Dr. W. G. Hope will address the meeting on "The Care and Prevention of Nervous Exhaustion and Prostration."

Dr. H. L. Verner will speak on "The Relation of the Mosquitoes, Water-bugs and Insects to Public Health."

King's Daughters Entertained.

Mrs. Helen Working was a gracious hostess last evening, the occasion being the regular business and social gathering of the King's Daughters of the Presbyterian church. Routine business was quickly dispatched and the guests gave their undivided attention to the pleasures of the evening. Games, laughter and reading begat the pleasant hours away. Miss Hill and Mrs. Helen Ward were heard in literary readings that were well delivered and well received. Refreshments was the last and one of

the most enjoyable features of the evening.

Epsilon League Social.
A few days in the calendar of the Epsilon League of the Highland Methodist church was the annual election of officers last Thursday evening. Mr. Gehringer of 506 East First avenue was master of the ceremony and gave royal entertainment to 100 Leaguees as soon as the important business of election was over. Music, games and social rome were enjoyed by the young people and the evening closed by partaking of delicious refreshments.

The officers elected to serve the League incoming year are President, Miss Maudie Both; First vice-president, J. E. Hickerson; Second vice-president, J. E. Montague; third vice-president, Miss Ida Clayton; fourth vice-president, Mrs. Marion Phillips, agent of Elgin Knit, 2100 Park Ave.

Here En Route to Europe.
Mr. and Mrs. John F. Nichols of Colorado have arrived in the city yesterday to be the guests for two days of Mrs. Nichols' mother, Mrs. N. T. Nichols of old West Chicago Avenue. Mr. and Mrs. Nichols will leave Sunday for New York where they will be en route to Europe.

Stage Dinner.
In the first of a series of "matters" of the other societies of the local American Legion, a stage dinner was held in the hall of the Legion on the 15th instant. The committee of ladies headed by Mrs. Constance Albin presented a most elegant program.

Reception.
The most notable affair on the social calendar for the season will be the reception and banquet Wednesday evening when Colonel Roosevelt, Mrs. Roosevelt and Miss Ethel Roosevelt will be the distinguished honored guests. Early in the evening the Elks' opera house will be the scene of a grand reception where the enthusiastic welcome he will receive will convince the traveler in many lands that "Hospitality" is the watchword of New Mexicans and that nowhere are the people more cordial than in the land of sunshine. Numerous members of his own Rough Rider regiment will be present to greet their

High School Entertainment

Under the auspices of the Criterion Literary society of the High school a splendid and somewhat unique program was tendered yesterday afternoon at the High school. A departure from the usual literary numbers was the reading in German, Japanese, Spanish and French by the accomplished young linguists of the school. The program follows:

Piano Solo—Miss Ruth Bredt Reading in German
Reading in Japanese—Letter Etched
Reading in Spanish—Miss Anna Myers
Reading in French—Miss Evelyn Fox
Piano Solo—Miss Anna Myers

Mrs. Roosevelt Here Tomorrow.

Mrs. Roosevelt and daughter, Miss Ethel, will be guests at the Alpine hotel tomorrow and will have the opportunity to see some of the mountains as they will remain all evening when the train to the southern part of New Mexico will be continued. The Roosevelt ladies will return however, en route to the reception and luncheon given by Colonel Roosevelt and himself.

Entertainment.
Mrs. Nichols' mother, Mrs. N. T. Nichols, and West Chicago Avenue, Mr. and Mrs. Nichols will leave Sunday for New York where they will be en route to Europe.

Stage Dinner.
In the first of a series of "matters" of the other societies of the local American Legion, a stage dinner was held in the hall of the Legion on the 15th instant. The committee of ladies headed by Mrs. Constance Albin presented a most elegant program.

Reception.
The most notable affair on the social calendar for the season will be the reception and banquet Wednesday evening when Colonel Roosevelt, Mrs. Roosevelt and Miss Ethel Roosevelt will be the distinguished honored guests. Early in the evening the Elks' opera house will be the scene of a grand reception where the enthusiastic welcome he will receive will convince the traveler in many lands that "Hospitality" is the watchword of New Mexicans and that nowhere are the people more cordial than in the land of sunshine. Numerous members of his own Rough Rider regiment will be present to greet their

commander, and social season of informal handshaking will precede the address promised by Colonel Roosevelt.

To banqueting at the Alpine hotel will be a number of military and civilian appointments. Only the members of the various dining clubs will limit the number of guests at the tables. At 12 o'clock the distinguished party will leave for Arizona, where Colonel Roosevelt will attend at the formal opening of the great Roosevelt reclamation dam.

Loring Lecture.

Mr. Loring's interesting talk will be the illustrated lecture in Elks theater Tuesday evening when Paul J. Alden Loring will talk on the travels "Through Africa with Roosevelt." As the naturalist who had charge of the Roosevelt expedition, Mr. Loring is qualified to render his observations instructive and appealing as central figure in the illustrated view.

WATER OUTLOOK IS GOOD FOR COMING SUMMER

Reports From All Over New Mexico Indicate Excellent Condition of the Various Watersheds.

Special to Evening Herald

Santa Fe, N. M., March 11.—The New Mexican special of the climatological service of the Weather Bureau has just issued its report on snowfall in the state.

A marked change has occurred in the method of irrigation water for the recent especially of the west half, and in lesser degree, for the Canadian and Northeast and the Pecos and Southern General and heavy snows between during the last half of February over all of the higher districts and the mountain ranges of the interior, and heavy rains over most of the lower levels, filling the soil with available moisture and changing a snow-covered surface to one of mineral environment. River water especially will be abundant in the San Juan and the Rio Grande and in some of the tributaries of the Colorado and the Pecos while the main streams will have a good early flow, unless high drying winds should occur in the spring months when the runoff will probably cause high water too early for most successful use. The stored depth is fair in the southwest but its holding qualities will be poor because of the lateness of the fall and the greater warmth of that region. Seasonal rains will be located there and also over the Capitan and Sacramento mountains in the northeast.

Normal wet and rather cool springs will aid materially in giving the territory a bountiful season.

San Juan and Northwest Watershed.

Cortez, Colo., N. W. Price—There is an abundance of snow, compact and sweet into the canons, and it will melt slowly. Pagosa Springs, Colo., C. P. Mack—There will be plenty of water. Snow is well distributed in valleys and mountains but it is drifting and needs the Cedar Hill Win. Craig. We had an unusual amount of rain and snow during February and the ground in the valley is well soaked. Durango, R. H. Davies—More snow fell in the mountains during the month but for several years Durango, G. H. Blakeslee—Snow is evenly distributed and compact water supply will be much better than for a number of years. Durango, G. S. Martin—Reservoir is full and we shall have plenty of water this season. Taos, J. F. Dugay—Cortado for water is very good. Great amount of snow fell and ground well compacted.

Rio Grande Watershed.

Alamogordo, J. D. Gossard—Snow is evenly distributed and compact good outlook for water supply. Chama, F. C. Johnson—Plenty of snow in mountains assures abundance of water for coming season. Gallup, A. W. Stephen—Snow is compact and drifted into canons and water supply will be better than for three past years. Arco, J. W. Medina—Snow is deep and firmly packed on mountains. The Caliente, A. P. Joseph and C. A. Hartman—Snow is evenly distributed and wet but in higher mountains even more encouraging. Red River, E. B. Peck—Heavy snow evenly distributed assures plenty of water for coming season. Taos, A. Guisbert—Traces snow in this vicinity at Twinning 6 to 7 feet and on L. S. mountain 2 feet. San Felipe, N. J. Strummond—Snow is evenly distributed and compact and outlook for water is excellent. Santa Fe, F. D. Owen—There is heavy snow on the higher peaks and in the lower levels of snow. Pe. basin has for several years with an ample water supply is assured. Alamogordo, H. C. Russell—Snow is evenly distributed and almost like ice good prospect for water. Jerome, L. S. Smith—Snow is deep, compact and evenly distributed. Superior, C. E. Flinn—Bush more snow than usual, dry and compact outlook for water supply is good. Mountainair, J. W. Corbett—Peak are covered, but more snow in canons and well packed. Better prospects for spring moisture than since 1907. Pecos, W. Lopez—Snow is drifted and compact water supply will be good. Pardin, F. H. Winslow—Heavy rains and snows have around a thorough soaking. Kent, G. W. Korn—Snow was evenly distributed and ratings will be fine.

San Francisco, Gila and Mimbres.

Glendale, Ariz., J. L. T. Warren—There was more snow fell in the mountains in February than during past 5 years, and heavy rains in the valley. Alpine, M. A. Blader—Mountains are well covered with snow and unless warm rains come a good water supply is assured. Aragon, J. B. McDonald—Water prospects are good, also a good spring season. Third, F. Baldwin—Snow never wet but not drifted outlook for water and early rains look excellent. Tijeras, C. H. Martin—Very little snow in canons but in foothills and

mountains it is from 3 to 15 inches deep. Santa Fe, J. W. Turner—Fine snows and general rains outlook for water better than for years. Cooke, Clark, Pecos—Over two feet of snow fell during the month in mountains, heavy rains in valleys and ground is soaked.

Canadian and Northeast Watershed.

Alvord, J. C. Lander—Snow is evenly distributed but not very compact outlook for water supply is encouraging. Bodie, B. W. Glens—Snow is drifted into canons and compact good outlook for water supply. Black Lake, H. T. Martinson—There will be a good supply of water for irrigation during the coming season. Baton, E. C. Crum—Snow is drifted and compact and outlook for water supply is good. Vermejo Park, H. W. Adams—The snow is loose in hills and canons but water prospects are good. Chama, G. W. Wood—Snow is evenly distributed and loose. Pasqualino, J. J. Herings—Snow is drifted badly, some drifts are eight feet deep. Chaco, E. M. Encinas—Snow is evenly distributed over the valley. Gasson, E. Dunn—Snow is evenly distributed, fairly compact and double the amount a year ago.

Pecos and Southeast Watershed.

East Las Vegas, F. O. Blood—Evenly distributed and outlook for water best in several years. Harvey Ranch, S. B. Warner—Snow is unusually deep on the mountain and trails are impassable in patches snow is 10 to 12 feet deep. Cisco, J. W. Thompson—Snow is evenly distributed, outlook for water supply is best for some years. Oberlin, W. M. Taber—Continuous and heavy snow storms have rendered outlook for summer months excellent. Chilcroft, J. J. Bailey—Heavy amounts of snow fell latter part of February followed by warm rains, causing much melting.

SOCIAL HYGIENE EXHIBIT.

Greatest of Its Kind Will Be Shown at Tuberculosis Congress

in Rome.

New York, March 11.—Word was received today from the headquarters of the Sixth International Congress on Tuberculosis that an American committee of one hundred members of the national association for the Study and Prevention of Tuberculosis has been appointed, and that preparations have been made for the special participation of the United States in the exhibition of social systems which will be held under the auspices of the congress. The dates of the congress are from September 20th to 26th, but the exhibition will probably open on June 1st and will continue until February 28, 1912.

The American committee of one hundred has been selected from practically every state in the United States. In addition to this committee it is expected that the federal government will also send official representatives to the congress and probably several of the states will take similar action. The headquarters of the committee are in the office of the national association, New York City.

The exhibition of social hygiene will be the greatest of its kind that has ever been assembled. Among the different sections of the exhibition are those on tuberculosis, general prophylaxis, history of hygiene, improvement, and the prevention of disease in general. The exhibition will cover a large area, fronting Madison Square. The authorities in charge of the exhibition are planning to set aside a separate pavilion for the United States exhibits provided these are numerous enough. All of the 300 state and local anti-tuberculosis committees allied with the national association will be asked to contribute to this exhibition. Other bodies engaged in the campaign

against preventable disease and for the betterment of public health will also be asked to contribute. The committee in charge of the exhibition has extended the time for the reservation of space until March 31st and the time for the receipt of material to June 30th.

Committees similar to the one appointed in the United States have been designated in over thirty different countries and representatives at the congress will be present from every civilized nation of the world. The exhibition and congress will be a part of a general celebration extending over several months, to commemorate the founding of Italian liberty. The entire movement will be held under the patronage of the King and Queen of Italy.

Any inquiries concerning application for membership in the congress and space in the exhibition should be addressed to the National Association for the Study and Prevention of Tuberculosis, 195 East 22d Street, New York City.

"BACK TO SOIL" CONVENT

Ad. Wedgwood Says He Will Join That Brigade: the Only Real Life Is Outdoors.

Chicago, March 11.—Ad. Wedgwood, champion light-weight pugilist of the world, is the latest convert to the "back to the soil" movement. At least that is what anybody would gather from his statement containing advice for retired fighters.

The farmer's life is the only one that gives an old ring man a chance to get the exercise and outdoor training to which he is used," said Ad. "A fighter has to do an amount of outdoor work in all kinds and there is nothing that comes up to the turning of the gentle furrow in its offerings in that line. Well, do you know that a man in the ring gets so he fairly hates the inside of a building. It's the outside life that appeals to him and it's the farm that offers him this same outside work to live in?"
